

## **Supplier Self Assessment**

### **Conflict Minerals, Cobalt and Mica**

## **Approved by TaylorWessing**

**Overview** > this assessment focuses on the following conflict minerals; tin, tantalum, tungsten, gold, cobalt and mica. It uses the reporting template standards of the Responsible Minerals Initiative (RMI).

The aim is to encourage a supplier that manufactures or imports products containing these minerals to complete the CMRT (Conflict Minerals Reporting Template - referring to TTT or gold) and/or the EMRT (Extended Minerals Reporting Template - referring to Cobalt or Mica).

These templates are completed via the RMI website;  
<https://www.responsiblemineralsinitiative.org/reporting-templates>

As the templates are in excel, soon we can add logic to the SSA to do checks of their answers

**Supplier target** > any supplier that manufactures or imports products containing tin, tantalum, tungsten, gold, cobalt or mica.

**Red flag questions** > non availability of the CMRT or EMRT. This can be lifted once they complete the templates
